GENERAL INFORMATION

Description

- Variable displacement, axial piston pump for open-circuit applications
- Continuous operation at pressures up to 280 bar
- High drive speed models for mobile markets and low noise models for industrial markets
- Quiet and efficient control capability
- Cam bearing design

Benefits

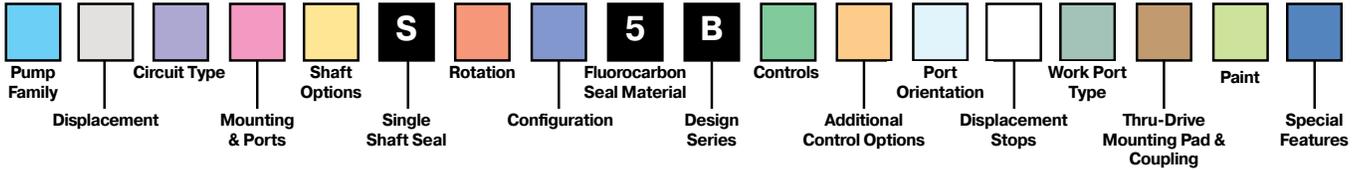

- Compact overall package size
- High power density
- Many different standard control options
- Modular controls for easy conversions
- High operating efficiency for lower power consumption and reduced heat generation
- Elastomer seals that eliminate gaskets and external leakage
- Simple hydraulic controls with “no-leak” adjustments
- Fast and stable compensator response
- SAE and ISO standard mounting flanges and ports
- Long life, roller shaft bearings
- Long life, low friction, hydrostatically balanced swash plate saddle bearings
- Full power through-drive capability
- Multiple case drain ports for various mounting orientations
- Optional minimum and maximum displacement adjustments
- Easy to service

*Intermittent is defined as less than 10% of operation time, not exceeding 20 successive seconds.

P1/PD MODEL ORDERING CODE

Pump Family	
P1	Mobile
PD	Industrial

Displacement	
018	18cc/rev
028	28cc/rev
045	45cc/rev
060	60cc/rev
075	75cc/rev
100	100cc/rev
140	140cc/rev

Circuit Type	
P	Open Circuit - One Side of Center
X¹	Open Circuit - Overcenter (45-140cc with P, T, S, U controls only)

¹ Requires Factory Approval

Mounting & Ports	
S	SAE mount; SAE work & aux ports
A	SAE mount; Metric work ports; BSPP aux ports
M	ISO mount; Metric work & aux ports
B	ISO mount; Metric work ports; BSPP aux ports
C	2-bolt SAE C mount; SAE work & aux ports (60 & 75cc only)
D	2-bolt SAE C mount; metric work ports; BSPP aux ports (60 & 75cc only)
J	2-bolt SAE-B mount; SAE work & aux ports (60cc only)

Shaft Options	
01	SAE Spline
02	SAE Keyed
04	ISO Keyed
06²	SAE Spline (18 & 100cc only)
08	SAE-B 13T Spline (28 & 45cc only)
09	SAE-BB 15T Spline (60cc only)
10	SAE-B 13T Spline (60cc only; Not with thru drive)

² 18cc de-rated to 210 bar and not available with thru drive

Rotation	
R	Clockwise
L	Counterclockwise

Configuration	
M	Mobile (P1)
S	Industrial (PD)
U³	Universal (45-140cc only)

³ Torque limiter ports drilled in the housing

Controls	
C0	Pressure Limiter
L0	Load sensing & pressure limiter
L2	Load sensing with bleed & pressure limiter
AM	Remote pressure limiter
AN	Remote pressure limiter with D03 interface
Electronic Displacement Controls	
P0	Min default; No Pmax override; 12 VDC
PM	Min default; No Pmax override; 24 VDC

CONTROLS INFORMATION

Control Option “C”

Pressure Limiter

Adjustment Range = 26-280 bar (380-4060 psi)

The “C0” pressure limiter control is used to limit the maximum system pressure. The control acts such that full pump displacement is achieved unless the system valve restricts the output flow or the load pressure reaches the maximum setting of the control. If pump flow is restricted by the system valve, the pump will provide only the flow demanded, but at the maximum pressure setting of the compensator control. If the outlet flow is completely blocked, the pump will destroke to zero displacement and maintain the pressure at the setting of the compensator spring.

C0 Schematic

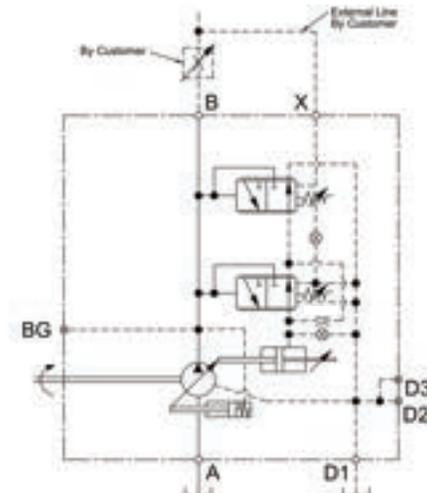

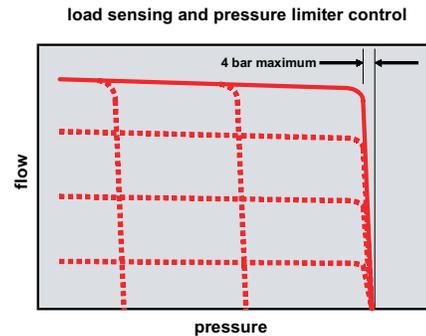

Control Option “L”

Load Sensing and Pressure Limiter

Pressure Limiter Adjustment Range = 26-280 bar (380-4060 psi)

Differential Adjustment Range = 10-40 bar (150-580 psi)

The “L0” and “L2” controls feature load sensing and maximum pressure compensation. A load sense line that comes from downstream of the main system throttling valve is connected to the “X” port on the control. This control matches pump flow and pressure to system demands by maintaining a constant pressure drop across the main system throttling valve, thus reducing horsepower losses. The pump automatically adjusts for changes in drive speed and load pressures. Choose the “L2” option if bleeding the load sense line at the pump is desired.

L0 Schematic

		Typical Control Response Time (ms)						
Control Description	Pump Operating Condition	018	028	045	060	075	100	140
“C” Pressure Limiter	Maximum Displacement to Zero	25	25	25	37	21	26	30
	Zero Displacement to Maximum	80	80	106	119	89	108	125
“L” Load Sensing	Maximum Displacement to Zero	40	40	30	54	40	43	45
	Zero Displacement to Maximum	70	70	120	186	97	189	280

* Based on NFPA testing standards

CONTROLS INFORMATION

Control Options “AM” Remote Operated Pressure Limiter

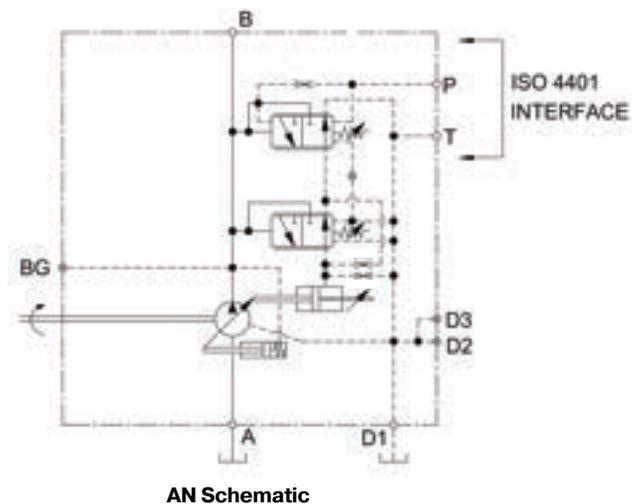

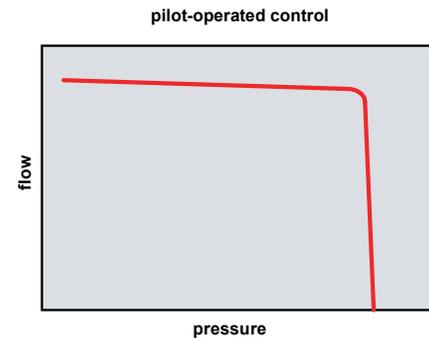

The “AM” control allows the pump pressure compensator setting to be adjusted from a remote relief valve that is connected to the “X” port on the control. The control acts such that full pump displacement is achieved unless the system valve restricts the output flow or the load pressure reaches the maximum setting of the control. If pump flow is restricted by the system valve, the pump will provide only the flow demanded, but at the maximum pressure setting of the compensator control. If the outlet flow is completely blocked, the pump will destroke to zero displacement and maintain the pressure at the setting of the remote relief valve.

Control Option “AN” Pilot Operated Control with ISO 4401 NG6 Interface for Customer Added Pressure Limiter

The “AN” control is a standard pressure compensator, but with a NG6 (D03) valve interface. It is the same as the “AM” control, but with the addition of an adapter block mounted between the pump housing and control to provide the NG6 (D03) interface. This allows a directional valve or proportional relief valve to be mounted directly on the pump to achieve a variety of pressure control circuits.

Caution: Pumps shipped with the “AN” control need to have a valve mounted to the NG6 interface for operation. This is not a functional control as shipped.

Typical Control Response Time (ms)

Control Description	Pump Operating Condition	018	028	045	060	075	100	140
“A” Pilot Operated Control	Maximum Displacement to Zero	25	25	46	43	37	39	40
	Zero Displacement to Maximum	80	80	131	125	115	123	130

* Based on NFPA testing standards

CONTROLS INFORMATION

Control Options “AMT,” “ANT,” and “LOT” Torque Limiting Controls: (45- 140cc only)

AMT = Remote pressure limiting with torque limiting
ANT = Pilot operated pressure limiting with torque limiting
LOT = Load sense & pressure limiting with torque limiting

These controls provide the benefit of pressure limiting control, plus the ability to limit the input torque when the power available from the prime mover is limited; or when the application power demand has both high flow/low pressure and low flow/high pressure operating conditions.

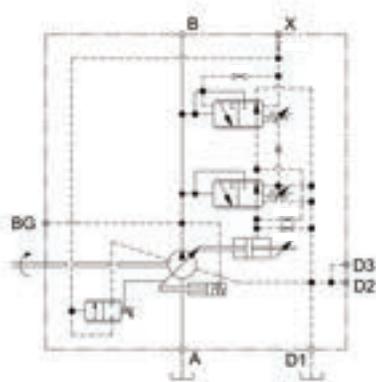

“AMT” & “ANT” Control

The “AMT” and “ANT” combine the pilot pressure limiter function with a torque limiting function. On the “AMT” control, the pressure limiter function is controlled remotely by connecting an external relief valve to the “X” port. On the “ANT” control, the pilot relief valve is mounted directly on the pump via the NG6 interface on the control block. Once the torque limiter setting is reached, the pump will destroke as pressure continues to rise in order to maintain the same input torque. Once the pressure limiter setting is reached, the pump will destroke to limit the system pressure.

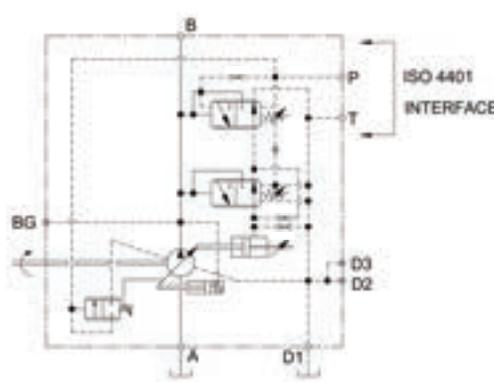

Caution: The ANT control will not function without a valve mounted on the NG6 interface.

“LOT” Control

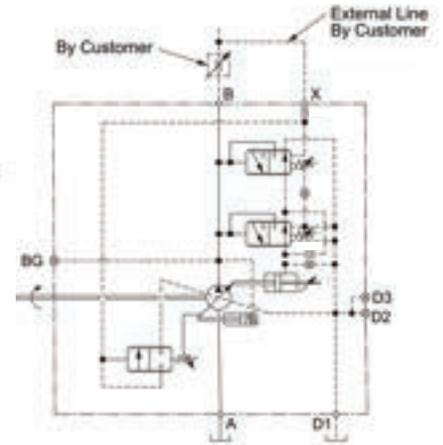

The “LOT” combines the functions of a pressure limiter, load sense and torque limiter control. The pressure limiter function limits the maximum pump outlet pressure. The load sense control function requires the “X” port to be connected to the highest load pressure via a load sense signal line. The control will match pump output flow and pressure to the system demand, thus minimizing horsepower losses. The pump will operate in a load sense mode until the torque limiter setting is reached, and then the pump will maintain the input torque at the pre-selected setting. If the system pressure reaches the pressure compensator setting, then the pump flow will be lowered to the level needed to maintain the maximum pressure setting.

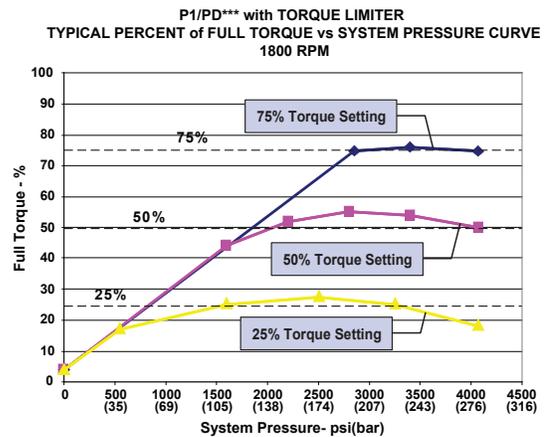

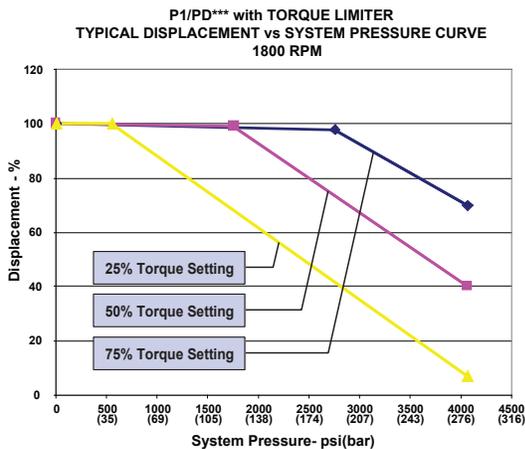

AMT Torque Limiter

ANT Torque Limiter

LOT Torque Limiter

CONTROLS INFORMATION

Control Options “P,” “T,” “S,” “U”

Electronic Proportional Displacement & Pressure Limiting

P = Min displacement default*

T = Max displacement default*

S = Min displacement default and hydromechanical pressure limiter

U = Max displacement default and hydromechanical pressure limiter

* Pumps without pressure limiter should be designed in a circuit with other means of pressure limitation.

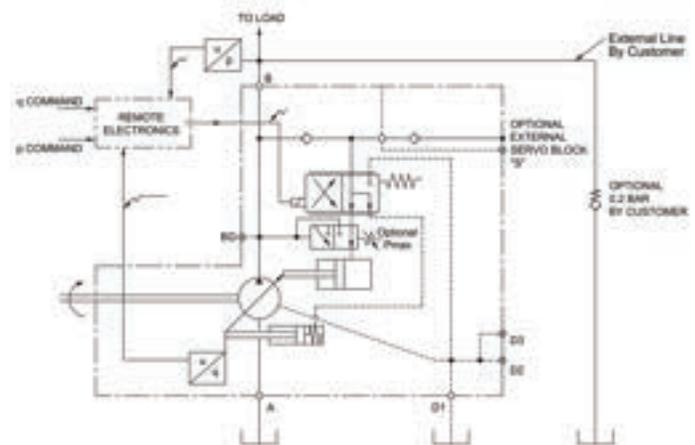

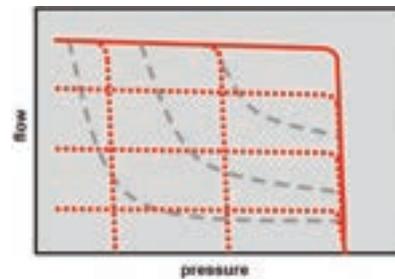

The control uses the D1FB electronic proportional valve from Parker's Hydraulic Valve Division to provide the precise flow specified per a displacement input command and maintain that flow level until a new displacement command level is received, or until the pressure command overrides to limit system pressure.

The holding current can vary from pump to pump, but is typically between 1.3-1.6 Amps for the 12V valve and 650-800 mA for the 24V valve.

A minimum of 25 bar servo pressure is required to control the pump. To control the pump at system pressure below 25 bar, either a sequence valve in the pressure line or an external servo source is required. Without adequate servo pressure, the pump is biased on stroke.

The mechanical pressure limiter will override the electronic inputs and limit pump outlet pressure to the preset level.

Using electronic control, the pump can be used in overcenter condition. (Energy recovery is one example of application for this.)

“S” Control Schematic

Electronic Proportional Valve Information		
Parameter	12 VDC	24 VDC
Resistance @ 20 C	4.4 Ohm	18.6 Ohm
Max Current	2.7 A	1.3 A
PWM Signal	100-250 Hz	
Typical Hysteresis*	<2%	
Connector	Deutsch DT04-2P	
Protection Class	IP66	

* Good results found with superimposed dither amplitude of +/- 200 mA for 12V valve and +/- 100 mA for 24V valve

Typical Control Response Times

Displacement (cc)	Response time (ms)						
	18	28	45	60	75	100	140
Max to zero	40	40	43	63	96	101	109
Zero to max	35	35	36	52	72	77	84

Displacement Sensor Wiring

DT04-3P Deutsch Connector		
Wire color	Pin #	Signal
Red	A	+5VDC
Black	B	0VDC
Blue	C	0 to 5VDC

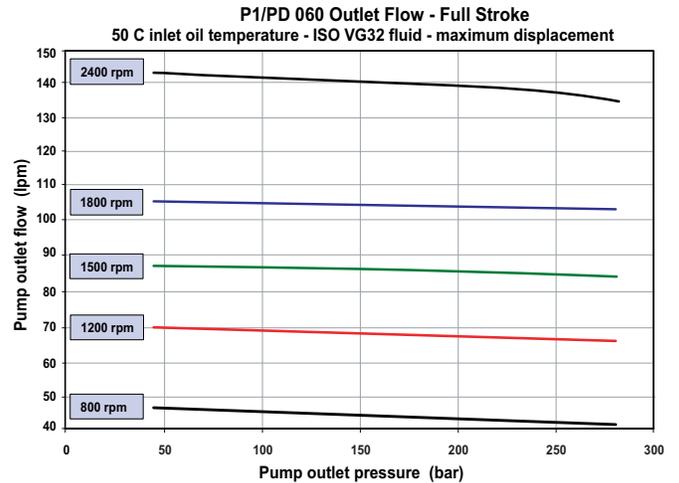

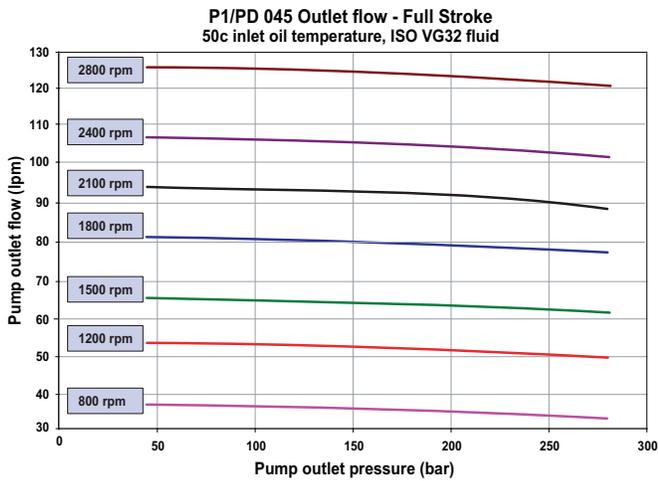

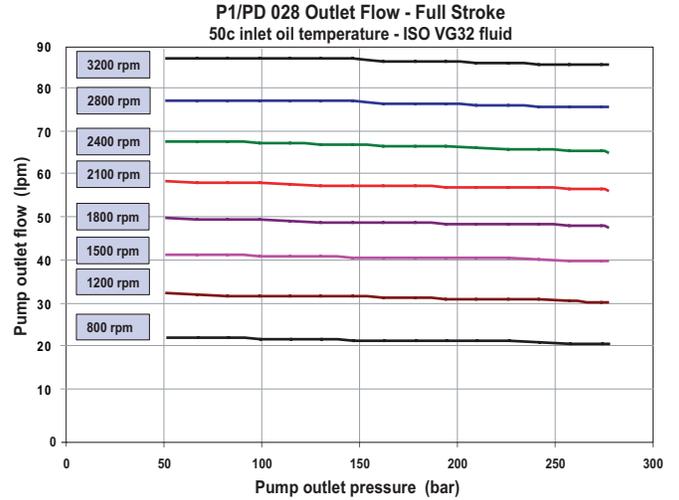

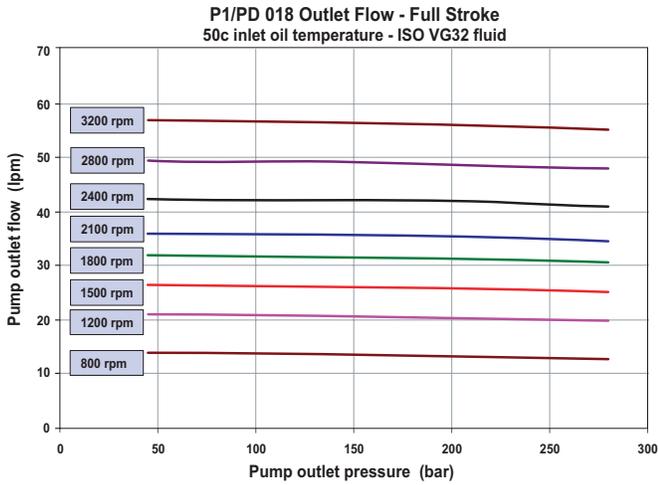

For CW:
Full stroke = 0.56VDC
Zero stroke = 2.5VDC
100% overcenter = 4.44VDC

For CCW:
Full stroke = 4.44VDC
Zero stroke = 2.5VDC
100% overcenter = 0.56VDC

INSTALLATION INFORMATION

Mounting	These pumps are designed to operate with the shaft horizontal or pointing downward. For shaft up mounting consult factory. The pump shaft must be in alignment with the shaft of the source driver and should be checked with a dial indicator. The mating pilot bore and coupling must be concentric. This concentricity is particularly important if the shaft is rigidly connected to the driven load without a flexible coupling.
Shaft Information	Splined: The shafts will accept a maximum misalignment of 0.15mm, 0.005 inch, total indicator reading. Angular misalignment at the external and internal spline axis must be less than ± 0.002 mm per mm of shaft radius, ± 0.002 inches per inch of shaft radius. The coupling interface must be lubricated. PARKER recommends lithium molydisulfide or similar grease. The internal coupling should be hardened to Rc 27-34 and must conform to SAE-J498c, class 5 flat root side fit. Keyed: High strength heat treated keys must be used. Replacement keys must be hardened to 27-34 Rc. The key corners must be chamfered 0.81-1.0 mm, 0.032"-0.040", at 45° to clear radii that exist in the keyway.
Side Load Capacity	The P1/PD series is designed for inline-drive. Side loading on the shaft is not recommended. If this is unavoidable consult your nearest PARKER representative.
Fluid Connections	Connect inlet and outlet lines to the port block of the pump. The maximum case pressure is 2 bar (30 psi) continuous, 4 bar (60 psi) intermittent. The case pressure must never exceed inlet pressure by more than .5 bar (7 psi). When connecting case drain line make certain that drain plumbing passes above highest point of the pump before passing to the reservoir. The case leakage line must be of sufficient size to prevent back pressure in excess of 2 bar(30 psi) and returned to the reservoir below the surface of the oil as far from the supply inlet as possible. All fluid lines, whether pipe, tubing, or hose must be adequate size and strength to assure free flow through the pump. An undersize inlet line will prevent the pump from operating properly at full rated speed. An undersize outlet line will cause back pressure and cause heat generation and increased noise. Flexible hose lines are recommended. If rigid piping is used, the workmanship must be accurate to eliminate strain on the pump port block or to the fluid connections. Sharp bends in the lines must be eliminated wherever possible. All system piping must be cleaned and flushed before installing pump. Make sure the entire hydraulic system is free of dirt, lint, scale, or other foreign material. CAUTION: Do not use galvanized pipe. Galvanized coating can flake off with continued use.
System Relief Valves	Although the P1/PD series pumps have very fast off-stroke compensator response, system relief valves are recommended in all cases for safety considerations.
Recommended Fluids	The fluid recommended for use in these pumps has a petroleum base and contains agents which provide oxidation inhibition and anti-rust, anti-foam and de-aerating properties as described in PARKER standard HF-1. Where anti-wear additive fluids are specified, see PARKER standard HF-0.
Viscosity Index	90 V. I. minimum. Higher values extend the range of operating temperature but may reduce the service life of the fluid.
Temperature	Determined by the viscosity characteristics of the fluid used. Because high temperatures degrade seals, reduce the service life of the fluid and create hazards, fluid temperature should not exceed 110°C (230°F) at the case drain.
Maintenance	The pump is self-lubricating and preventative maintenance is limited to keeping system fluid clean by changing filters frequently. Keep all fittings and screws tight. Do not operate at pressures and speeds in excess of the recommended limit. If the pump does not operate properly, check the troubleshooting chart before attempting to overhaul the unit. Overhauling may be accomplished by referring to the disassembly, rework limits of wear parts, and assembly procedures as provided in this service manual.
Fluid Cleanliness	Fluid must be cleaned before and continuously during operation, by filters that maintain a cleanliness level of ISO 20/18/14. Better cleanliness levels will significantly extend the life of the components. As contaminant generation may vary with each application, each must be analyzed to determine proper filtration to maintain the required cleanliness level.

Fluid motor speed	rpm	$\frac{1000 \times \text{flow rate (Lpm)} \times \text{volumetric eff.}}{\text{displacement (cm}^3/\text{rev)}}$
Fluid motor torque	Nm	$\frac{\text{pressure (bar)} \times \text{displacement (cm}^3/\text{rev)} \times \text{mech. eff.}}{20\pi}$
Fluid motor power	kW	$\frac{\text{rpm} \times \text{torque (Nm)} \times 2\pi}{60000} = \frac{\text{flow (Lpm)} \times \text{pressure (bar)} \times \text{overall eff.}}{600}$

EXTENSIVE HYDRAULIC PRODUCT OFFERING

Accumulators

Piston, bladder and diaphragm type accumulators, gas bottles and KleenVent reservoir isolators.

www.parker.com/had

Compact Hydraulics

Self-contained with a motor, gear pump, reservoir, internal valving, load hold checks and relief valves.

www.parker.com/had

Cylinders

Standard and custom hydraulic cylinders for industrial and mobile applications.

www.parker.com/had

Electronics/Remote Controls

Parker's unique IQAN approach combines sturdy, well-tested hardware with intelligent, flexible computing power.

www.parker.com/iqan

Filtration

Pressure and return line filters enhances machine life, reduces maintenance and lowers costs.

www.parker.com/hfde

Integrated Hydraulic Circuits

Solutions for complex circuits that include threaded cartridge valves integrated into a single manifold.

www.parker.com/hvs

Motors

Full line of high and low speed motors provides power up to 15,000 in-lbs of torque.

www.parker.com/hpm

Power Take Off

Parker Chelsea leads the industry for engineering, innovation and performance in auxiliary power systems.

www.parker.com/chelsea

Power Units

The most complete line of standard, pre-engineered, cataloged hydraulic power units in the industry.

www.parker.com/hpm

Pumps

Broad line of energy-efficient hydraulic pumps that includes piston, vane and gear pumps.

www.parker.com/hpm

Rotary Actuator

Industry leader in the design and manufacture of hydraulic rack and pinion, and vane style rotary actuators.

www.parker.com/had

Valves and Controls

Hydraulic valves for virtually every hydraulic equipment application, from simple to precise control.

www.parker.com/hvs

OFFER OF SALE

The items described in this document and other documents and descriptions provided by Parker Hannifin Corporation, Hydraulics Group, and its authorized distributors ("Seller") are hereby offered for sale at prices to be established by Seller. This offer and its acceptance by any customer ("Buyer") shall be governed by all of the following Terms and Conditions. Buyer's order for any item described in its document, when communicated to Seller verbally, or in writing, shall constitute acceptance of this offer. All goods or work described will be referred to as "Products".

1. Terms and Conditions. Seller's willingness to offer Products, or accept an order for Products, to or from Buyer is expressly conditioned on Buyer's assent to these Terms and Conditions and to the terms and conditions found on-line at www.parker.com/saleterms/. Seller objects to any contrary or additional term or condition of Buyer's order or any other document issued by Buyer.

2. Price Adjustments; Payments. Prices stated on the reverse side or preceding pages of this document are valid for 30 days. After 30 days, Seller may change prices to reflect any increase in its costs resulting from state, federal or local legislation, price increases from its suppliers, or any change in the rate, charge, or classification of any carrier. The prices stated on the reverse or preceding pages of this document do not include any sales, use, or other taxes unless so stated specifically. Unless otherwise specified by Seller, all prices are F.O.B. Seller's facility, and payment is due 30 days from the date of invoice. After 30 days, Buyer shall pay interest on any unpaid invoices at the rate of 1.5% per month or the maximum allowable rate under applicable law.

3. Delivery Dates; Title and Risk; Shipment. All delivery dates are approximate and Seller shall not be responsible for any damages resulting from any delay. Regardless of the manner of shipment, title to any products and risk of loss or damage shall pass to Buyer upon tender to the carrier at Seller's facility (i.e., when it's on the truck, it's yours). Unless otherwise stated, Seller may exercise its judgment in choosing the carrier and means of delivery. No deferment of shipment at Buyers' request beyond the respective dates indicated will be made except on terms that will indemnify, defend and hold Seller harmless against all loss and additional expense. Buyer shall be responsible for any additional shipping charges incurred by Seller due to Buyer's changes in shipping, product specifications or in accordance with Section 13, herein.

4. Warranty. Seller warrants that the Products sold hereunder shall be free from defects in material or workmanship for a period of eighteen months from the date of delivery to Buyer. The prices charged for Seller's products are based upon the exclusive limited warranty stated above, and upon the following disclaimer: **DISCLAIMER OF WARRANTY: THIS WARRANTY COMPRISES THE SOLE AND ENTIRE WARRANTY PERTAINING TO PRODUCTS PROVIDED HEREUNDER. SELLER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS AND IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.**

5. Claims; Commencement of Actions. Buyer shall promptly inspect all Products upon delivery. No claims for shortages will be allowed unless reported to the Seller within 10 days of delivery. No other claims against Seller will be allowed unless asserted in writing within 60 days after delivery or, in the case of an alleged breach of warranty, within 30 days after the date within the warranty period on which the defect is or should have been discovered by Buyer. Any action based upon breach of this agreement or upon any other claim arising out of this sale (other than an action by Seller for any amount due to Seller from Buyer) must be commenced within thirteen months from the date of tender of delivery by Seller or, for a cause of action based upon an alleged breach of warranty, within thirteen months from the date within the warranty period on which the defect is or should have been discovered by Buyer.

6. LIMITATION OF LIABILITY. UPON NOTIFICATION, SELLER WILL, AT ITS OPTION, REPAIR OR REPLACE A DEFECTIVE PRODUCT, OR REFUND THE PURCHASE PRICE. IN NO EVENT SHALL SELLER BE LIABLE TO BUYER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF, OR AS THE RESULT OF, THE SALE, DELIVERY, NON-DELIVERY, SERVICING, USE OR LOSS OF USE OF THE PRODUCTS OR ANY PART THEREOF, OR FOR ANY CHARGES OR EXPENSES OF ANY NATURE INCURRED WITHOUT SELLER'S WRITTEN CONSENT, EVEN IF SELLER HAS BEEN NEGLIGENT, WHETHER IN CONTRACT, TORT OR OTHER LEGAL THEORY. IN NO EVENT SHALL SELLER'S LIABILITY UNDER ANY CLAIM MADE BY BUYER EXCEED THE PURCHASE PRICE OF THE PRODUCTS.

7. Contingencies. Seller shall not be liable for any default or delay in performance if caused by circumstances beyond the reasonable control of Seller.

8. User Responsibility. The user, through its own analysis and testing, is solely responsible for making the final selection of the system and Product and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application and follow applicable industry standards and Product information. If Seller provides Product or system options, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the Products or systems.

9. Loss to Buyer's Property. Any designs, tools, patterns, materials, drawings, confidential information or equipment furnished by Buyer or any other items which become Buyer's property, may be considered obsolete and may be destroyed by Seller after two consecutive years have elapsed without Buyer placing an order for the items which are manufactured using such property. Seller shall not be responsible for any loss or damage to such property while it is in Seller's possession or control.

10. Special Tooling. A tooling charge may be imposed for any special tooling, including without limitation, dies, fixtures, molds and patterns, acquired to manufacture Products. Such special tooling shall be and remain Seller's property notwithstanding payment of any charges by Buyer. In no event will Buyer acquire any interest in apparatus belonging to Seller which is utilized in the manufacture of the Products, even if such apparatus has been specially converted or adapted for such manufacture and notwithstanding any charges paid by Buyer. Unless otherwise agreed, Seller shall have the right to alter, discard or otherwise dispose of any special tooling or other property in its sole discretion

at any time.

11. Buyer's Obligation; Rights of Seller. To secure payment of all sums due or otherwise, Seller shall retain a security interest in the goods delivered and this agreement shall be deemed a Security Agreement under the Uniform Commercial Code. Buyer authorizes Seller as its attorney to execute and file on Buyer's behalf all documents Seller deems necessary to perfect its security interest. Seller shall have a security interest in, and lien upon, any property of Buyer in Seller's possession as security for the payment of any amounts owed to Seller by Buyer.

12. Improper Use and Indemnity. Buyer shall indemnify, defend, and hold Seller harmless from any claim, liability, damages, lawsuits, and costs (including attorney fees), whether for personal injury, property damage, patent, trademark or copyright infringement or any other claim, brought by or incurred by Buyer, Buyer's employees, or any other person, arising out of: (a) improper selection, improper application or other misuse of Products purchased by Buyer from Seller; (b) any act or omission, negligent or otherwise, of Buyer; (c) Seller's use of patterns, plans, drawings, or specifications furnished by Buyer to manufacture Product; or (d) Buyer's failure to comply with these terms and conditions. Seller shall not indemnify Buyer under any circumstance except as otherwise provided.

13. Cancellations and Changes. Orders shall not be subject to cancellation or change by Buyer for any reason, except with Seller's written consent and upon terms that will indemnify, defend and hold Seller harmless against all direct, incidental and consequential loss or damage. Seller may change product features, specifications, designs and availability with notice to Buyer.

14. Limitation on Assignment. Buyer may not assign its rights or obligations under this agreement without the prior written consent of Seller.

15. Entire Agreement. This agreement contains the entire agreement between the Buyer and Seller and constitutes the final, complete and exclusive expression of the terms of the agreement. All prior or contemporaneous written or oral agreements or negotiations with respect to the subject matter are herein merged.

16. Waiver and Severability. Failure to enforce any provision of this agreement will not waive that provision nor will any such failure prejudice Seller's right to enforce that provision in the future. Invalidation of any provision of this agreement by legislation or other rule of law shall not invalidate any other provision herein. The remaining provisions of this agreement will remain in full force and effect.

17. Termination. This agreement may be terminated by Seller for any reason and at any time by giving Buyer thirty (30) days written notice of termination. In addition, Seller may by written notice immediately terminate this agreement for the following: (a) Buyer commits a breach of any provision of this agreement (b) the appointment of a trustee, receiver or custodian for all or any part of Buyer's property (c) the filing of a petition for relief in bankruptcy of the other Party on its own behalf, or by a third party (d) an assignment for the benefit of creditors, or (e) the dissolution or liquidation of the Buyer.

18. Governing Law. This agreement and the sale and delivery of all Products hereunder shall be deemed to have taken place in and shall be governed and construed in accordance with the laws of the State of Ohio, as applicable to contracts executed and wholly performed therein and without regard to conflicts of laws principles. Buyer irrevocably agrees and consents to the exclusive jurisdiction and venue of the courts of Cuyahoga County, Ohio with respect to any dispute, controversy or claim arising out of or relating to this agreement. Disputes between the parties shall not be settled by arbitration unless, after a dispute has arisen, both parties expressly agree in writing to arbitrate the dispute.

19. Indemnity for Infringement of Intellectual Property Rights. Seller shall have no liability for infringement of any patents, trademarks, copyrights, trade dress, trade secrets or similar rights except as provided in this Section. Seller will defend and indemnify Buyer against allegations of infringement of U.S. patents, U.S. trademarks, copyrights, trade dress and trade secrets ("Intellectual Property Rights"). Seller will defend at its expense and will pay the cost of any settlement or damages awarded in an action brought against Buyer based on an allegation that a Product sold pursuant to this Agreement infringes the Intellectual Property Rights of a third party. Seller's obligation to defend and indemnify Buyer is contingent on Buyer notifying Seller within ten (10) days after Buyer becomes aware of such allegations of infringement, and Seller having sole control over the defense of any allegations or actions including all negotiations for settlement or compromise. If a Product is subject to a claim that it infringes the Intellectual Property Rights of a third party, Seller may, at its sole expense and option, procure for Buyer the right to continue using the Product, replace or modify the Product so as to make it noninfringing, or offer to accept return of the Product and return the purchase price less a reasonable allowance for depreciation. Notwithstanding the foregoing, Seller shall have no liability for claims of infringement based on information provided by Buyer, or directed to Products delivered hereunder for which the designs are specified in whole or part by Buyer, or infringements resulting from the modification, combination or use in a system of any Product sold hereunder. The foregoing provisions of this Section shall constitute Seller's sole and exclusive liability and Buyer's sole and exclusive remedy for infringement of Intellectual Property Rights.

20. Taxes. Unless otherwise indicated, all prices and charges are exclusive of excise, sales, use, property, occupational or like taxes which may be imposed by any taxing authority upon the manufacture, sale or delivery of Products.

21. Equal Opportunity Clause. For the performance of government contracts and where dollar value of the Products exceed \$10,000, the equal employment opportunity clauses in Executive Order 11246, VEVRAA, and 41 C.F.R. §§ 60-1.4(a), 60-741.5(a), and 60-250.4, are hereby incorporated.

CONTENT INDEX

March 2026	Removed 85cc Removed AE, AF, AG, AH, & unload controls
August 2021	Removed ECU from catalog Removed design series change page Corrected minor miscellaneous errors
April 2021	Revised shaft torques Revised AMT & LOT Revised formulas page
September 2020	Changed remaining A-mod controls to B-mod Added conversion & formulas page Corrected minor miscellaneous errors
March 2020	Corrected AN, AE/AF, & 45 & 60 LOT/AMT control images Corrected minor miscellaneous errors
November 2019	Added B-mod information Consolidated model code pages Added P1/PD-085 Updated controls information to B-mod Added AG/AH controls Added unload controls Added valve specs on electrical controls Added housing & shaft options on 060 Remove 4-bolt SAE-B thru mount option Removed 24V "M" electronic control option Revised performance data section Updated dimensional section with B-mod dimensions Updated controls dimensional section
August 1, 2014	Add 1A valve to standard options Miscellaneous minor updates
January 30, 2014	P1045 - All drawings updated
April 1, 2013	Addition of P1/PD018 thru drive Miscellaneous drawings updates Shaft torque rating consolidation Electrical connector information

**WARNING - USER RESPONSIBILITY**

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

- This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety, and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based on data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.
- The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

OFFER OF SALE

The items described in this document are hereby offered for sale by Parker-Hannifin Corporation, its subsidiaries or its authorized distributor. This offer and its acceptance are governed by the provisions stated in Parker's detailed "Offer of Sale" (copy available upon request).
